

Client Edition

Update Guide

1. Navigate to “Client Version Update” on the “Products” page of leanEdit.com

NOTE: Make sure your current version of leanEdit is closed before attempting the update. Failure to do so may result in the loss of project and video files

2. Click on the DOWNLOAD button to download the installer file

3. When prompted enter the password and hit SUBMIT

NOTE: contact leanEdit support to obtain the current password

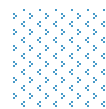

4. Navigate to your Downloads folder and open the leanEdit installer zip file

5. Open the leanEdit installer application file

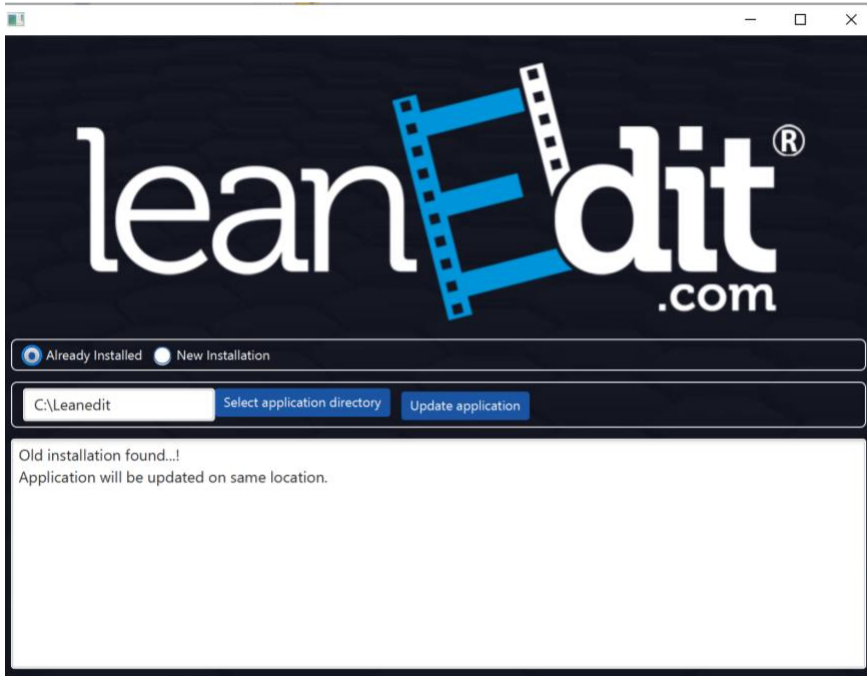

6. Hit “Extract all”, then “Extract” to extract files to the suggested location when prompted

7. Open the leanEdit installer file from the extracted folder

NOTE: If a Windows warning message appears, click “More info” then click “Run anyway”

7. Click “Yes” if you see a pop up asking if you want to make changes to your device
8. Select the “Already Installed” radio button to update your current version

9. Once the installer recognizes your existing version “Old Installation found” should appear in the update window
10. Click “Update application” to install the new version.

NOTE: If the current location is blank then hit “Select application directory” and select C:\Leanedit as your current location
10. Once the update is complete you will see a pop up saying “Application updated successfully”.
11. Click “OK” to close the pop up
12. Open leanEdit to use the new version
